Uri-Bug

Uri-bug[™] Biological Washroom Cleaner

Product Description

Uri-bug Universal Biological Washroom Cleaner utilises specific microbes and co surfactants for cleaning and deodorising urinals, toilets and all washroom areas.

- Triple action cleans, deodorises and reduces scale build-up.
- Viscous formulation to create a long lasting cling to toilet bowls and urinals leaving them odour free and clean.
- Product-specific microbes establish effective self-renewing biofilms deep inside inaccessible plumbing lines.
- Long-lasting foam in the toilet bowl.
- The product microbes break down organic matter including ammonia, volatile fatty acids, proteins and uric acid, long after product application.
- Natural, safe and effective way to combat organic waste and odour problems.
- Cleans pipes and drain lines.
- Safe on all washroom surfaces including: walls/tiles, floors, toilets, urinals and sinks.

How Does it Work

It's no secret that toilets and urinals smell. They become covered in scale, which can lead to blockages. If not cleaned effectively, can have a costly repercussion within the pipework of the drainage system.

Uri-bug[™] Universal Biological Washroom Cleaner combines biodegradable surfactants, mental fragrance and specific microbial strains to digest organic debris at the source.

The microbes secrete enzymes that break down:

• Insoluble and unsightly uric scale, significantly reducing it's build up and potential to block pipes.

• Organic compounds including ammonia, volatile fatty acids and proteinaceous waste, providing long-lasting odour control.

Directions For Use

750ML - For all washroom surfaces: Spray area and wipe with a damp cloth, no need to rinse. For urinals and toilets: Spray and walk away.

5L - Replace the cap with Uri-bug[™] push pump, dispense 3-4 pumps into the mop bucket. Then half fill the bucket with warm water. Mop floors with the solution and leave to air dry, **DO NOT re-mop or mix with any other cleaning product**. For urinals and toilet cleaning: Dispense 1-2 pumps directly into the toilet or urinal, **DO NOT rinse**.

Environmental

- Local UK production and supply chain reduces CO2e impact from transport.
- Technologies are renewable and sustainable, sourced from plant extracts, fermentation, microbes and manufacturing by-products reducing CO2e and environmental toxicity.
- Post-consumer recycled bottles provide a circular life cycle reducing CO2e and removing physical plastic pollution.
- Readily biodegradable (99% over < 28 days).
- 0% manufacturing waste.
- Not tested on animals.
- Excludes all 'watch list' raw materials.

Health & Safety

Full guidance on the handling and disposal of this product is provided in a separate Safety Data Sheet (SDS). Store in original closed containers away from extremes of temperatures.

Areas of use:

Contains: Thickening agent, menthol fragrance, water softeners, cleaning agents and product specific microbes
